

Quality Technician

Team: Bloc PPE
Working to: Quality Manager
Working with: Bloc PPE Team

What does this role contribute to the Company?

This role will be based at our subsidiary manufacturing facility at Bloc PPE Ronan Valley industrial Estate in Magherafelt which is Northern Ireland's first indigenous dedicated PPE manufacturing facility.

In this role you will monitor and improve the quality of operational processes and outputs. Responsibilities include inspecting materials, equipment, processes, and products, identifying process improvements and corrective actions. Working with managers and supervisors to develop, implement and maintain quality measures.

Full training will be provided to understand in-house systems/processes.

What we will ask of you:

You will be responsible for:

- Inspecting and testing materials, equipment, processes, and products to ensure quality specifications are met.
- Performing product, process and QMS audits
- Monitoring, recording and reporting operations quality performance.
- Developing and implementing quality standards and control systems.
- Investigating and troubleshooting product or production issues.
- Developing corrective actions, solutions, and improvements.
- Supplier related quality issues investigations and nonconforming product disposition
- Performing equipment calibration and assisting with external calibrations
- Collaborating with Operations to develop and implement controls and improvements
- Other duties commensurate with the role.

Ideally you will have the follow experience:

Essential

- 2+ years of experience in quality controller, quality process auditor, inspector or similar role.
- 1+ years' experience in a quality role in a high-volume production environment.
- Strong communication and interpersonal skills, and use of ERP ICT systems.
- Strong attention to detail, including form completion.
- Ability read and interpret specifications and drawings.
- Ability to work shifts and additional hours when required to support production needs.

Preferred

- Technical, engineering or quality qualification such as HNC, BTEC or City and Guilds.
- Quality assurance / control qualifications.
- Experience in a medical device manufacturing or similar environment, including clean rooms.

What will we do for you?

The Company has ambitious plans for growth and is keen to build a team who can grow alongside the business, so there are opportunities for development, coupled with the opportunity to work with one of the most innovative and passionate teams in the industry.

How to apply?
